Dear Prof. Shi,

I hope all is well.

Per my previous email, I am following up to share with you our work on HKU5, which is attached to this email.

Please let me know if you have any questions.

Best regards

David

Dear Prof. Shi,

Please accept my apologies for the slow response.

Thank you for your email and for letting me know about the deposition of the bat cell line.

I would like to propose to coordinate submission of our manuscripts and perhaps ensure that our data agree if this sounds reasonable to you.

Best regards

David

Dear Huan, Thank you very much for your email. We are willing to collaborate with Prof. Veessler.

Dear Prof. Veessler, Please let me know what we can contribute to your planned submission regarding the HKU5. By the way, we have deposited our bat cell lines in China Centre for Type Culture Collection (cctcc.whu.edu.cn) affiliated to Wuhan University. I was told that they are not able to exchange the cell lines outside of China due to administration regulations. I'm sorry for that.

Best regards,

Zhengli,

Zhengli Shi, Ph.D

Subject: HKU5 projects

Dear Prof. Shi and Prof. Veesler,

I hope all is well. As I separately communicated with you recently, I have learned that both of your teams have made significant progress on HKU5-related projects, albeit with a different focus. I think it might be important to establish communication between your teams and probably keep both sides posted. I am willing to offer any assistance that would facilitate the submissions and promote our future collaborations.

Best regards,
Huan
